Hi Becky,

Sorry I was not able to get back to you yesterday. As Nancy noted, we are in the final stages of review of all the documents that need to be finalized in order to go out for public comment. When you and I last spoke, I committed to providing a copy of the permit to Excelsior once it has cleared management review, but before it goes out for formal notice. That commitment has not changed.

If you have questions or concerns about this, please feel free to contact Audrey or me.

Thanks,
David

David Albright, Acting Assistant Director

EPA Region 9 Water Division (WTR-3)

Subject: Gunnison Draft UIC

David;

I spoke with Nancy this morning and was told that the Gunnison Draft UIC is in review by EPA management and would not go to Public Comment until October 25, 2017. We are disappointed in the delay, but understand that the review is critical prior to the draft going public. Excelsior has not seen the draft in sometime and would like the opportunity to review, both for accuracy and internal planning purposes.

In the interest of everyone's schedules and meeting the October 25, 2017 publication date, we would like to be reviewing the draft now, concurrently with EPA's internal review.

Please call me to discuss if this is not possible.

Thank you,

Rebecca A. Sawyer
